

IB Physics Topic D2 Electric and Magnetic Fields; SL & HL

By timthedev07, M25 Cohort

Table of Contents

1	Electrostatics — Interaction of Charges	1
2	Conservation of Charge	2
3	Mechanisms of Charge Transfer	3
3.1	Friction	3
3.2	Contact	3
3.3	Induction	3
4	Electric Fields	4
4.1	Coulomb's Law	4
4.1.1	Coulomb's Constant	4
4.2	Electric Field Strength	4
4.3	Vector Addition of Fields	4
4.4	Field Line Patterns	4
4.5	Parallel Plates Equations	4
4.6	Electron Volt Conversions	4
4.7	Field Close to a Conductor	4
4.8	Field Around a Spherical Conductor	4
4.9	Millikan's Oil Drop Experiment	4
4.10	Electric Potential	4
4.11	Electric Potential Energy	4
5	Magnetic Fields	5
5.1	Field Line Patterns	5
5.1.1	Straight Wire	5
5.1.2	Circular Coil	5
5.1.3	Solenoid	5

1 **Electrostatics — Interaction of Charges**

2 Conservation of Charge

3 Mechanisms of Charge Transfer

3.1 Friction

3.2 Contact

3.3 Induction

4 Electric Fields

4.1 Coulomb's Law

4.1.1 Coulomb's Constant

4.2 Electric Field Strength

4.3 Vector Addition of Fields

4.4 Field Line Patterns

4.5 Parallel Plates Equations

4.6 Electron Volt Conversions

4.7 Field Close to a Conductor

4.8 Field Around a Spherical Conductor

4.9 Millikan's Oil Drop Experiment

4.10 Electric Potential

4.11 Electric Potential Energy

5 Magnetic Fields

5.1 Field Line Patterns

5.1.1 Straight Wire

5.1.2 Circular Coil

5.1.3 Solenoid
